Installation Template for 8K and 9K Dummy Trim

Important
Fold along the appropriate dotted line and place on the high edge of the door bevel.

Check the lock for the proper backset before drilling.

Notes
1. For 1DT, prepare the door for two #8 x 1" screws.
2. For 2DT, drill two 9/32" diameter through holes.
3. Since the 1DT function is surface-mounted, door thickness does not apply. The 2DT function is for 1 3/4" doors.

NEW 8K 9K
